5. Pittsburgh Regional Transit Fare Media Update

- a. Staff from Pittsburgh Regional Transit reported on plans and changes for the agency’s fare media. They noted that they are pleased with the Masabi-powered “Ready to Ride” pilot project. The plan is switch to Masabi’s account-based system starting in the spring of 2024, possibly including a fare-capping policy. In addition, PRT plans to issue a Request for Proposals for new Masabi-compatible ticket-vending machines and a system of cash-only, on-vehicle fareboxes. The plan is to sunset the current S&B-based ConnectCard by the end of 2025. The TVMs need to replace 1-for-1 the S&B system, but PRT hopes to also expand the network. ConnectCard will be replaced with a new fare card.

6. Regional Mobile Ticketing Feasibility Study

- a. SPC staff and the project consultant team updated the TOC on the ongoing Regional Mobile Ticketing Study.
- i. The team asked the TOC to help promote a brief user survey.
- ii. Guest Gillian Gillette from the California Department of Transportation’s CalITP program briefed the TOC on that state’s approach to transit ticketing, based on an open technology platform. Gillette said the goal was to have a system that uses the existing banking network, rather than force riders to convert their money into a transit fare currency. In the CalITP system, riders are treated like customers and the transit agency is a merchant—riders can use their existing payment systems, such as credit and debit cards. The benefits of this approach include lower operating costs, faster transaction speed (and lower dwell times), more people already have compatible payment media (don’t need fare cards), fare capping is “organic” to the model. CalITP is making its technology available nationally and there has been interest from other agencies. The plan to incorporate compatibility for the un/under-banked involves working with “bank-like” card services that can turn mobility into a pathway to financial inclusion, for example by using services that do not require a minimum balance before purchasing a transit fare. Other fare policy issues that are under development include ways to qualify individuals for subsidies or discounts—CalITS is working with the federal government’s Login.Gov system as a demonstration to allow

benefits for seniors. They are also working to integrate GTFS and real-time transit tracking into the ticketing system. So far, 7 agencies have adopted the system and 50 more are in-progress.

7. Staff Updates:

- a. Staff reported that they were meeting with stakeholders in the Allegheny River Valley about potential to extend transit service including using SPC's *SmartMoves Connections* Multimodal Hub concepts.
- b. SPC are looking to move into new offices around the end of June, in Pittsburgh's Strip District.
- c. Public Participation meetings are ongoing for the draft Long Range Transportation Plan update.
- d. *There were no staff updates.*

8. Other Business

- a. The TOC meeting calendar will be presented at the next meeting.
- b. Alan Blahovec volunteered to serve on the TOC Officers Nominating Committee to nominate candidates to serve a two-year term as Chairperson and Vice-Chairperson. He will report back to the Committee at the June 14th meeting.
- c. The next meeting of the SPC Transit Operators Committee is scheduled for Wednesday, June 14, 2023 at 10am. This will be a virtual (Webex) meeting.

9. Adjournment

- a. The meeting was adjourned on a motion by Ashley Seman and a second by David Richards.
